RezExpert Online Service – RezRobot Managers

RezRobot Users Presentation #4
CEO Shares Company Policy with Managers

online.rezexpert.com

Our Privacy Policy

1. "Save for gathering anonymous regional statistics, Digital Rez will share nothing about your business without your prior approval."

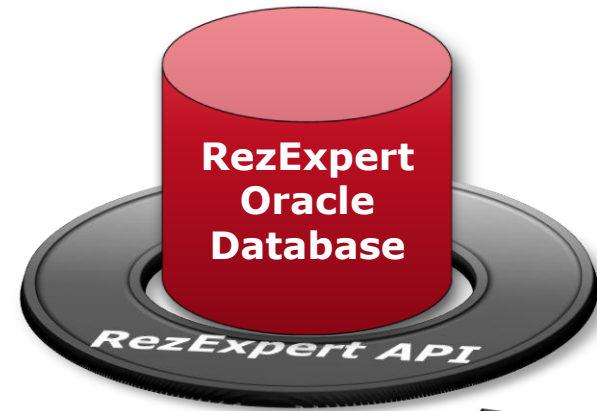

2. "Digital Rez will share anonymous regional statistics, system-wide data with every business on the system."

3. "Our commitment to you, the Business Owner is that we acknowledge that you have ownership of the data contained in ALL of the records pertaining to your Company. However, insofar as Digital Rez has also assisted in the conveyance of payment information to your business from good-faith purchasers, our joint responsibility is legally bound for audit, PCI compliancy for both parties and certified PA DSS compliancy on our part."

4. "This does NOT imply there is ANY jointly held responsibility on the part of Digital Rez to ensure the accuracy and/or honesty of any conveyance or exchange of resort-specific feature, rate, availability or business status information to any Central Rez Systems like Expedia.com or RVTripsetter.com."

Ken Lahoda, CEO
Digital Rez International

The *RezExpert* API

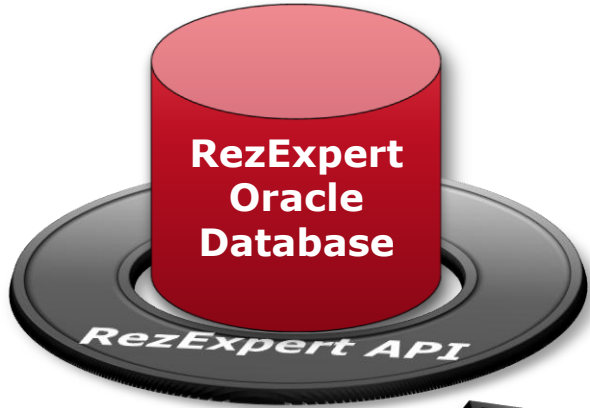

An **Application Programming Interface (API)** is a secure system wrapped around our software that enables it to **interact with itself and other software.**

This is just like ROS2006 / RVT Front Desk talks to JetPay through a secure API to provide **RezCollect** transactions.

An API is auto-published by our application to present our vocabularies and latest calling conventions, and is the only mechanism used to access and securely exchange services with us.

The RezExpert API is now 5 years old

RezExpert's API is PCI Compliant

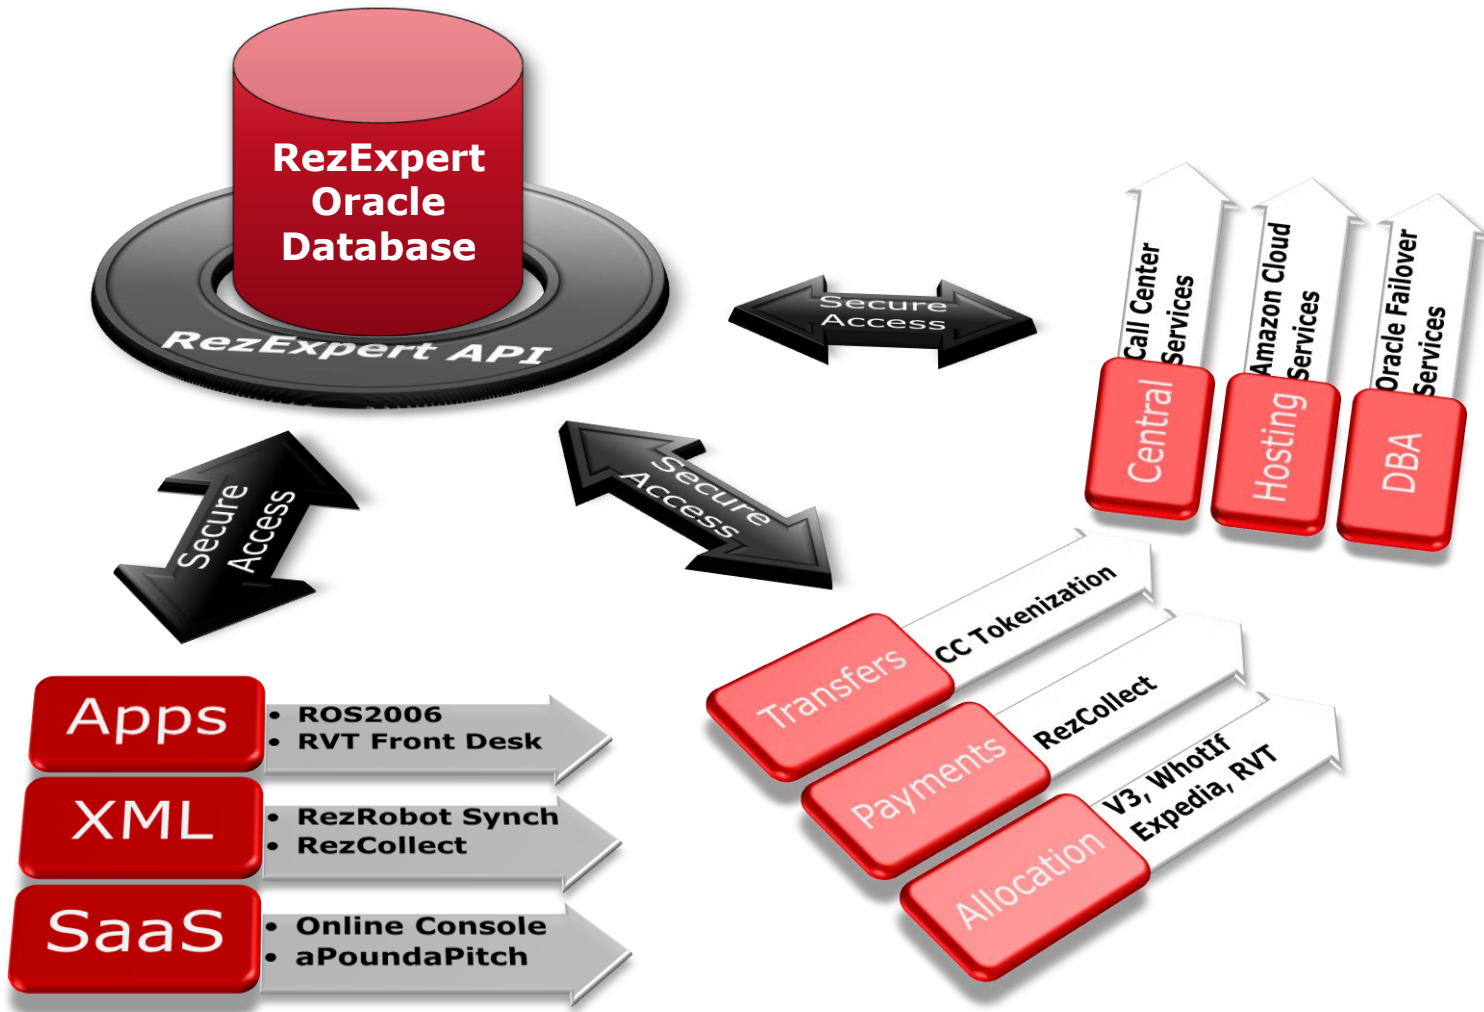

Phase 3

Phase 2

RezExpert's API is Versatile

RezExpert's API is Secure

A secure API puts RX Console on an iPad, in your hands, on your property's Wi-Fi network.

The **RezExpert** API helps us to work for you here...
